Web Developer

- Skilled in front-end development and design
- Creative, keen eye for detail and style
- Hard working, good team member and communicator

Technical Skills:

HTML, CSS, Bootstrap, Foundation, JavaScript, jQuery, Server-Side APIs, Node.js, GitHub, git, Adobe XD.

Projects:

- Game Soundtrack Search Application
AJAX calls to Deezer and RAWG APIs for search results. Users can store results with client-side storage. Used HTML, CSS, Foundation framework, JavaScript, jQuery. Collaborated with Patrick Kaczmar, Mena Wahba, and Aaron Walls.
Deployed Application: <https://patrick-kaczmar.github.io/GameBops/>
- Weather Dashboard
Search for current weather and 5-day forecast using Open Weather API. Previously searched cities are stored and rendered on the page. Used HTML, CSS, JavaScript, and JQuery.
Deployed Application: <https://gregriss.github.io/weather-dash/>
- Workday Scheduler
Save tasks to hourly time blocks using client-side storage. JavaScript Date object provides current Day, date, and hour. Used HTML, CSS, JavaScript, and jQuery.
Deployed Application: <https://gregriss.github.io/plan-your-day/>

Education:

- Rutgers Coding Bootcamp -- Somerset, NJ
Full Stack Flex Web Development Certificate, course in progress
